SIR:

In response to the Office Action dated June 10, 2003, please
amend the above-identified application as follows:

IN THE CLAIMS:

1. (Previously amended) An apparatus for separating soil, the
apparatus comprising:

a frame;

an axle associated with the frame;

a cylinder associated with the frame;

discs attached to the frame wherein the discs are aligned on
and attached to the axle between the frame and the soil and further
wherein the discs rotate upon contact with the soil; and

a controller associated with the cylinder wherein the
controller is remote from the frame and controls movement of the
frame such that the discs are moved with the frame and wherein the
frame pivots with respect to the axle.
